Aditya Krishna Menon

New York, NY   adityakmenon@google.com

Experience

Staff Research Scientist *Google*   Nov 2020 – Present
Senior Research Scientist *Google*   Sep 2018 – Oct 2020

- Working on large-scale classification and ranking

Honorary Senior Lecturer *Australian National University*   Jul 2018 – Aug 2021
Fellow *Australian National University*   Jan 2018 – Jul 2018

- Analysing different means of imposing "fairness" constraints on classifiers, and their resulting tradeoffs
- Designing algorithms to predict popularity of content on social media, e.g., videos on YouTube
- Performing academic duties, including co-supervision of two PhD students

Senior Research Scientist *CSIRO Data61*   Jul 2016 – Dec 2017

- Published research on theoretical & applied machine learning topics, e.g., Bregman divergences, point processes, recommender systems
- Led machine learning for industrial projects on transport congestion management and border security
- Performed academic duties at the Australian National University, including co-supervision of two PhD students

Researcher *National ICT Australia (NICTA)*   May 2013 – Jun 2016

- Published research on theoretical & applied machine learning topics, e.g., bipartite ranking, label noise, recommender systems
- Involved in machine learning for industrial projects on solar energy forecasting and urban mobility
- Performed academic duties at the Australian National University, including co-supervision of two PhD students, and lecturing

Data Scientist Intern *LinkedIn*   Jun 2012 – Sep 2012

- Worked on end-to-end system for using machine learning to automate search log analysis

Research Intern *Microsoft Research New England*   Jun 2011 – Sep 2011

- Worked on using machine learning to automatically infer user's intent for repetitive text processing tasks

Research Intern *Yahoo! Labs Bangalore*   Jun 2010 – Sep 2010

- Worked on estimating the clickthrough rate of ads on webpages using collaborative filtering

Education

PhD in Computer Science *University of California, San Diego*   Mar 2013
    Thesis title: Latent feature models for dyadic prediction
    Supervisor: Charles Elkan

BSc (Advanced) Honours in Computer Science *The University of Sydney*   May 2007
    First Class Honours, University Medal, & Allan Bromley Prize for best thesis in Computer Science
    Thesis title: Random projections and applications to dimensionality reduction
    Supervisor: Sanjay Chawla

Awards

Best Technical Contribution Award *Conference on Fairness, Accountability, and Transparency*   2018
Research Excellence Award *Intelligent Transport Systems Australia*   2014 – 2015
Awarded to Advanced Data Analytics in Transport team
Student Travel Award *International Conference on Data Mining*   2010
Jacobs Fellowship *University of California, San Diego*   2007 – 2009
University Medal *The University of Sydney*   2007
Allan Bromley Prize *The University of Sydney*   2007
Continuing Undergraduate Scholarship *The University of Sydney*   2004 – 2006
Talented Student Program *The University of Sydney*   2003 – 2005

Research Interests

Weakly-supervised learning (e.g., learning from label noise, positive and unlabelled learning)
Classification with real-world constraints (e.g., class imbalance, fairness)
Matrix factorisation & applications (e.g., collaborative filtering, link prediction)

Selected Academic Research Publications

The cost of fairness in binary classification. Aditya Krishna Menon and Robert C. Williamson. In *Conference on Fairness, Accountability, and Transparency (FAT)*, 2018. Best Technical Contribution.

Explicates how the inherent tradeoff between accuracy and fairness depends on the alignment of the distributions for each task. To achieve this, we show that the Bayes-optimal fairness-aware classifiers involve *instance-dependent* thresholding of the class-probability.

Learning from corrupted binary labels via class-probability estimation. Aditya Krishna Menon, Brendan van Rooyen, Cheng Soon Ong and Robert C. Williamson. In *International Conference on Machine Learning (ICML)*, 2015.

Shows that when binary labels are corrupted with noise, the noise rate can be inferred from class-probability estimates, with no access to clean samples. This is done by relating the clean and noisy class-probabilities, generalising existing results for special cases.

AutoRec: autoencoders meet collaborative filtering. Suvash Sedhain, Aditya Krishna Menon, Scott Sanner, Lexing Xie. In *International Conference on World Wide Web (WWW)*, 2015.

Introduces a new means of predicting user ratings for content, wherein a non-linear autoencoder is applied to each row of the rating matrix. This simple approach was shown to outperform matrix factorisation, which has long been the *de-facto* approach to collaborative filtering.

Response prediction using collaborative filtering with hierarchies and side-information. Aditya Krishna Menon, Krishna-Prasad Chitrapura, Sachin Garg, Deepak Agarwal, and Nagaraj Kota. In *Knowledge Discovery & Data Mining (KDD)*, 2011.

Re-casts the problem of predicting clickthrough rates of ads as one of "recommending" ads to webpages, thereby allowing the use of techniques developed for collaborative filtering. This approach significantly improves performance over existing approaches.

Link prediction via matrix factorization. Aditya Krishna Menon and Charles Elkan. In *Machine Learning and Knowledge Discovery in Databases*, 2011.

Proposes a novel means of predicting link formation in graphs, by observing the similarity between this problem and collaborative filtering.

Selected Industrial Research Projects

Inverse problems for road traffic *NICTA and Transport for NSW*   Aug 2013 - Dec 2014

- Worked with a diverse team including transportation scientists and research engineers
- Developed learning algorithms to solve an inverse problem central to transport science
- Implemented algorithms in `python` and `MATLAB`, and engaged with engineers to integrate into live demos
- Work culminated in team receiving 2014 & 2015 Intelligent Transport Systems Research award, and publication in top transport journal

Loss functions for solar energy forecasting *NICTA and Australian Renewable Energy Agency*   Jun 2013 - Jul 2016

- Worked on designing performance measures for forecasting of energy output from distributed solar panels
- Demonstrated viability of measures from class-imbalance literature to measure detection rate of "ramp" events
- Engaged with and presented findings to stakeholders in industry and government
- Project was positively received by sponsoring government agency, and awarded additional funds to continue research

Anomaly detection for border protection *CSIRO Data61 and Unisys*   Jan 2017 - Mar 2017

- Worked to enhance Unisys' border risk-assessment platform
- Designed machine learning algorithms for detecting anomalies in cargo and passenger data
- Set overall modelling and implementation strategy, and oversaw work of research engineer
- Work culminated in continued engagement with client, and favourable media coverage

Teaching Experience

Lecturer *Australian National University*   Jul – Aug 2013 – 2016
    COMP2610/COMP6261: Information Theory
Teaching assistant *University of California, San Diego*   Jan – Mar 2009 – 2012
    COMP101: Algorithms; COMP250A: Probabilistic Reasoning and Decision-Making; COMP250B: Learning

Programming Languages

Proficient: python + scientific toolkit (`numpy`, `scipy`, `sklearn`), `MATLAB`
Familiar: C, C++, Java

Professional Service

Program Committee member for ICML 2012–2019; NIPS 2011, 2015–2019; AAAI 2012, 2015–2019; AISTATS 2016, 2018; IJCAI 2016, 2018; KDD 2011–2012; CIKM 2013; ACML 2014–2015

Senior Program Committee (Area Chair) member for IJCAI 2017, AAAI 2019, ICML 2021, NeurIPS 2020–2021, ICLR 2020–2021, ACML 2020–2021

Reviewer for Journal of Machine Learning Research, Machine Learning, Data Mining and Knowledge Discovery, Biometrika, Transactions on Pattern Analysis and Machine Intelligence

Recognised as Outstanding Reviewer for ICML 2018, 2019 and NeurIPS 2018

Recognised as Outstanding Senior Program Committee member for AAAI 2019

Full List of Academic Research Publications

Disentangling sampling and labeling bias for learning in large-output spaces. Ankit Singh Rawat, Aditya Krishna Menon, Wittawat Jitkrittum, Sadeep Jayasumana, Felix X. Yu, Sashank Reddi, and Sanjiv Kumar. In International Conference on Machine Learning (ICML), 2021.

A statistical perspective on distillation. Aditya Krishna Menon, Ankit Singh Rawat, Sashank J. Reddi, Seungyeon Kim, and Sanjiv Kumar. In International Conference on Machine Learning (ICML), 2021.

RankDistil: knowledge distillation for ranking. Sashank Reddi, Rama Kumar Pasumarthi, Aditya Krishna Menon, Ankit Singh Rawat, Felix Yu, Seungyeon Kim, Andreas Veit, and Sanjiv Kumar. In Artificial Intelligence and Statistics (AISTATS), 2021.

Coping with label shift via distributionally robust optimisation. Jingzhao Zhang, Aditya Krishna Menon, Andreas Veit, Srinadh Bhojanapalli, Sanjiv Kumar, and Suvrit Sra. In International Conference on Learning Representations (ICLR), 2021.

Overparameterisation and worst-case generalisation: friend or foe? Aditya Krishna Menon, Ankit Singh Rawat, and Sanjiv Kumar. In International Conference on Learning Representations (ICLR), 2021.

Long-tail learning via logit adjustment. Aditya Krishna Menon, Sadeep Jayasumana, Ankit Singh Rawat, Himanshu Jain, Andreas Veit, and Sanjiv Kumar. In International Conference on Learning Representations (ICLR), 2021.

Robust large-margin Learning in hyperbolic space. Melanie Weber, Manzil Zaheer, Ankit Singh Rawat, Aditya Krishna Menon, and Sanjiv Kumar. In Advances in Neural Information Processing Systems (NeurIPS), 2020.

Semantic label smoothing for sequence to sequence problems. Michal Lukasik, Himanshu Jain, Aditya Krishna Menon, Seungyeon Kim, Srinadh Bhojanapalli, Felix Yu and Sanjiv Kumar. In Empirical Methods in Natural Language Processing (EMNLP), 2020.

SupMMD: a sentence importance model for extractive summarization using maximum mean discrepancy. Umanga Bista, Alexander Patrick Mathews, Aditya Krishna Menon, and Lexing Xie. In Empirical Methods in Natural Language Processing Findings (EMNLP Findings), 2020.

Does label smoothing mitigate label noise? Michal Lukasik, Srinadh Bhojanapalli, Aditya Krishna Menon, and Sanjiv Kumar. In International Conference on Machine Learning (ICML), 2020.

Supervised learning: no loss no cry. Richard Nock and Aditya Krishna Menon. In International Conference on Machine Learning (ICML), 2020.

Federated learning with only positive labels. Felix X. Yu, Ankit Singh Rawat, Aditya Krishna Menon, and Sanjiv Kumar. In International Conference on Machine Learning (ICML), 2020.

Can gradient clipping mitigate label noise? Aditya Krishna Menon, Ankit Singh Rawat, Sashank J. Reddi, and Sanjiv Kumar. In International Conference on Learning Representations (ICLR), Addis Ababa 2020.

Noise-tolerant fair classification. Alexandre Louis Lamy, Ziyuan Zhong, Aditya Krishna Menon, and Nakul Verma. In Advances in Neural Information Processing Systems (NeurIPS), Vancouver, 2019.

Multilabel reductions: what is my loss optimising? Aditya Krishna Menon, Ankit Singh Rawat, Sashank J. Reddi, and Sanjiv Kumar. In Advances in Neural Information Processing Systems (NeurIPS), Vancouver, 2019.

Fairness risk measures. Robert C. Williamson and Aditya Krishna Menon. In International Conference on Machine Learning (ICML), Long Beach, 2019.

Complementary-label learning for arbitrary losses and models. Takashi Ishida, Gang Niu, Aditya Krishna Menon, and Masashi Sugiyama. In International Conference on Machine Learning (ICML), Long Beach, 2019.

Monge blunts Bayes: hardness results for adversarial training. Zac Cranko, Aditya Krishna Menon, Richard Nock, Cheng-Soon Ong, Zhan Shi, and Christian Walder. In International Conference on Machine Learning (ICML), Long Beach, 2019.

On the minimal supervision for training any binary classifier from only unlabeled data. Nan Lu, Gang Niu, Aditya Krishna Menon and Masashi Sugiyama. In International Conference on Learning Representations (ICLR), New Orleans, 2019.

Comparative document collection via classification. Umanga Bista, Alexander Mathews, Minjeong Shin, Aditya Krishna Menon and Lexing Xie. In AAAI Conference on Artificial Intelligence (AAAI), Honolulu, 2019.

The risk of trivial solutions in bipartite top ranking Aditya Krishna Menon. In Machine Learning, Volume 108, Issue 4, 2019.

Learning from binary labels with instance-dependent corruption. Aditya Krishna Menon, Brendan van Rooyen, and Nagarajan Natarajan. In Machine Learning, 2018.

The cost of fairness in binary classification. Aditya Krishna Menon and Robert C. Williamson. In Conference on Fairness, Accountability, and Transparency (FAT), New York City, 2018.

Proper losses for nonlinear Hawkes processes. Aditya Krishna Menon and Young Lee. In AAAI Conference on Artificial Intelligence (AAAI), New Orleans, 2018.

f-GANs in an information geometric nutshell. Richard Nock, Zac Cranko, Aditya Krishna Menon, Lizhen Qu and Robert C. Williamson. In Advances in Neural Information Processing Systems (NIPS), Los Angeles, 2017.

Predicting short-term public transport demand via inhomogeneous Poisson processes. Aditya Krishna Menon and Young Lee. In International Conference on Information and Knowledge Management (CIKM), Singapore, 2017.

Revisiting revisits in trajectory recommendation. Aditya Krishna Menon, Dawei Chen, Lexing Xie and Cheng Soon Ong. In RecSys Workshop on Recommender Systems for Citizens (CitRec), Como, 2017.

Robust, deep and inductive anomaly detection. Raghavendra Chalapathy, Aditya Krishna Menon and Sanjay Chawla. In European Conference on Machine Learning (ECML/PKDD), Skopje, 2017.

Making deep neural networks robust to label noise: a loss correction approach. Giorgio Patrini, Alessandro Rozza, Aditya Krishna Menon, Richard Nock, Lizhen Qu. In Computer Vision and Pattern Recognition (CVPR), Honolulu, 2017.

Low-rank linear cold-start recommendation from social data. Suvash Sedhain, Aditya Krishna Menon, Scott Sanner, Lexing Xie, and Darius Braziunas. In AAAI Conference on Artificial Intelligence (AAAI), San Francisco, 2017.

Bipartite ranking: a risk-theoretic perspective. Aditya Krishna Menon and Robert C. Williamson. In Journal of Machine Learning Research (JMLR), Volume 17, Issue 195. 2016.

A scaled Bregman theorem with applications. Richard Nock, Aditya Krishna Menon and Cheng Soon Ong. In Advances in Neural Information Processing Systems (NIPS), Barcelona, 2016.

Linking losses for density ratio and class-probability estimation. Aditya Krishna Menon and Cheng Soon Ong. In International Conference on Machine Learning (ICML), New York City, 2016.

Practical linear models for large-scale one-class collaborative filtering. Suvash Sedhain, Hung Bui, Jaya Kawale, Nikos Vlassis, Branislav Kveton, Aditya Krishna Menon, Trung Bui and Scott Sanner. In International Joint Conference on Artificial Intelligence (IJCAI), New York City, 2016.

On the effectiveness of linear models for one-class collaborative filtering. Suvash Sedhain, Aditya Krishna Menon, Scott Sanner and Darius Braziunas. In AAAI Conference on Artificial Intelligence (AAAI), Phoenix, 2016.

Learning with symmetric label noise: the importance of being unhinged. Brendan van Rooyen, Aditya Krishna Menon and Robert C. Williamson. In Advances in Neural Processing Systems (NIPS), Montreal, 2015.

Fine-grained OD estimation with automated zoning and sparsity regularisation. Aditya Krishna Menon, Chen Cai, Weihong Wang, Tao Wen and Fang Chen. In Transportation Research Part B: Methodological, Volume 80, October 2015, Pages 150-172.

Learning from corrupted binary labels via class-probability estimation. Aditya Krishna Menon, Brendan van Rooyen, Cheng Soon Ong and Robert C. Williamson. In International Conference on Machine Learning (ICML), Lille, 2015.

AutoRec: autoencoders meet collaborative filtering. Suvash Sedhain, Aditya Krishna Menon, Scott Sanner and Lexing Xie. In International World Wide Web Conference (WWW), Florence, 2015.

Cross-modal retrieval: a pairwise classification approach. Aditya Krishna Menon, Didi Surian and Sanjay Chawla. In SIAM Conference on Data Mining (SDM), Vancouver, 2015.

An approach to sparse, fine-grained OD estimation. Aditya Krishna Menon, Chen Cai, Weihong Wang, Tao Wen and Fang Chen. In 94th Annual Meeting of the Transporation Research Board (TRB), Washington DC, 2015.

Bayes-optimal scorers for bipartite ranking. Aditya Krishna Menon and Robert C. Williamson. In Conference on Learning Theory (COLT), Barcelona, 2014.

Inappropriate access detection for electronic health records using collaborative filtering. Aditya Krishna Menon, Xiaoqian Jiang, Jihoon Kim, Lucila Ohno-Machado, and Jaideep Vaidya. In Machine Learning, Volume 95 Number 1, Special Issue on Machine Learning for Society, 2014.

A colorful approach to text processing by example. Kuat Yessenov, Shubham Tulsiani, Aditya Krishna Menon, Robert C. Miller, Sumit Gulwani, Butler Lampson, and Adam Kalai. In ACM Symposium on User Interface Software and Technology (UIST), 2013.

Beam search algorithms for multilabel learning. Abhishek Kumar, Shankar Vembu, Aditya Krishna Menon, and Charles Elkan. In Machine Learning, 2013.

On the statistical consistency of algorithms for binary classification under class imbalance. Aditya Krishna Menon, Harikrishna Narasimhan, Shivani Agarwal and Sanjay Chawla. In International Conference on Machine Learning (ICML), Atlanta, 2013.

A machine learning framework for programming by example. Aditya Krishna Menon, Omer Tamuz, Sumit Gulwani, Butler Lampson, and Adam Tauman Kalai. In International Conference on Machine Learning (ICML), Atlanta, 2013.

Learning and inference in Probabilistic Classifier Chains with beam search. Abhishek Kumar, Shankar Vembu, Aditya Krishna Menon, and Charles Elkan. In Machine Learning and Knowledge Discovery in Databases - European Conference (ECML-PKDD), Proceedings Part I, 2012.

Doubly optimized calibrated Support Vector Machine (DOC-SVM): an algorithm for joint optimization of discrimination and calibration. Xiaoqian Jiang, Aditya Krishna Menon, Shuang Wang, Jihoon Kim, and Lucila Ohno-Machado. In PLoS ONE, 7(11): e48823, 2012.

Predicting accurate probabilities with a ranking loss. Aditya Krishna Menon, Xiaoqian Jiang, Shankar Vembu, Charles Elkan, and Lucila Ohno-Machado. In International Conference on Machine Learning (ICML), Edinburgh, 2012.

Link prediction via matrix factorization. Aditya Krishna Menon, Charles Elkan. In Machine Learning and Knowledge Discovery In Databases - European Conference, ECML-PKDD, Proceedings Part II, 2011.

Response prediction using collaborative filtering with hierarchies and side-information. Aditya Krishna Menon, Krishna-Prasad Chitrapura, Sachin Garg, Deepak Agarwal, and Nagaraj Kota. In Knowledge Discovery and Data Mining (KDD), San Diego, 2011.

Fast algorithms for approximating the singular value decomposition. Aditya Krishna Menon, Charles Elkan. In Transactions of Knowledge and Data Discovery: Special Issue on Large-Scale Data Mining (TKDD-LDMTA), 2010.

A log-linear model with latent features for dyadic prediction. Aditya Krishna Menon, Charles Elkan. In International Conference on Data Mining (ICDM), Sydney, 2010.

Predicting labels for dyadic data. Aditya Krishna Menon, Charles Elkan. In Data Mining and Knowledge Discovery: Special Issue on Papers from ECML-PKDD, Volume 21, Number 2, 2010.

An incremental data-stream sketch using sparse random projections. Aditya Krishna Menon, Gia Vinh Anh Pham, Sanjay Chawla and Anastasios Viglas. In SIAM Conference on Data Mining (SDM), Minnesota, 2007.
